The Stinger Attachments RRG Series Root & Rock Grapple Bucket. is the same design as our Rock Open Grapples, but with a wider spacing. The wider spacing helps let unwanted debris fall through with more ease. It also lightens the overall weight of the bucket over our ROG Series as an advantage for smaller machines with a lower lift capacity. Even though it is a lighter attachment, it is still built with the quality and strength of the ROG. The RRG is a very popular model for residential customers, hobby farms and commercial applications.

PROPER BLAST REQUIRED
